

# Safety Flier

*Directions:*

1. Construct a one page safety flier.
2. You may use the lesson segments, notes and the Internet.
3. The flier should be specific to oxy-fuel welding and cutting.
4. The safety procedures should be displayed on the flier numbered and in sequential order.
5. Fliers should be neat, organized and easy to read.
6. Present fliers to the class and turn in for a grade.
7. Once graded your fliers will be hung in the shop.
